LinkedIn · Portfolio · GitHub · Eligible to work in Japan (Permanent Resident)

SUMMARY

Computer Science student interested in building practical, user-focused software and turning technical ideas into reliable tools. Brings a hands-on learning approach, cross-cultural communication experience, and a strong interest in software engineering.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Woxsen University, Telangana, India · 2024–Present · GPA: 8.7/10 · Expected graduation: 2028

International student studying in India.

LEADERSHIP & EXPERIENCE

President, Woxsen Japan Centre (WJC) · May 2025–Present

- Lead a 150+ member student organization, coordinating executive activities, planning initiatives, and supporting engagement around Japanese language and culture.
- Organized a 120-hour JLPT N5 program with NaRa Japan Hub, engaging 90+ students in structured Japanese-language learning.
- Coordinate engagement with 15+ delegations from Japanese universities, organizations, and industry partners, supporting cross-cultural communication and institutional relationships.
- Helped deliver Kizuna Matsuri in collaboration with JETRO, The Japan Foundation, and Toshiba T&D (India).

SKILLS

Python, Java, Bash, React, HTML, CSS, Flask, MySQL, MongoDB, Linux, WSL2, Git, GitHub, OpenCV, MediaPipe, PySide6

PROJECTS

LensFlow — Gesture-Controlled Desktop Automation · Python · OpenCV · MediaPipe · PySide6 · GitHub

- Built a desktop tool for gesture-based computer control, with real-time hand tracking, confidence-based recognition, gesture stabilization, configurable action profiles, and PowerPoint navigation.

LinuxMonitor — Bash System Monitor · Bash · Linux · WSL2 · Git

- Created a live system monitor tracking CPU, memory, disk, load, processes, and connectivity; added NORMAL/WARNING/CRITICAL thresholds and service monitoring.

Phoenix — Self-Healing Software System · Python · LLMs · Groq API · Pytest · Git

- Developed the LLM Engine for incident diagnosis and root-cause analysis, with multi-file code patch generation. Added patch validation, API/error handling, fallback responses, and automated tests.

Found It — Campus Lost & Found Platform · React · Flask · MongoDB · GitHub

- Developed a full-stack campus platform for item reporting and retrieval, connecting frontend, backend, and database workflows.

CERTIFICATIONS

JLPT N3 (Japanese Language Proficiency Test) · Object-Oriented Design — University of Alberta · Java Programming: Solving Problems with Software — Duke University · Introduction to Cloud Computing on AWS — Udemy

LANGUAGES

Japanese: Conversational (JLPT N3) · English: Professional · Hindi: Professional working proficiency · Telugu: Native
